**Utah Death Certificate Index**

By – Shanna Jones  
WCPAF President

A computer index to hundreds of thousands of historic Utah death certificates is now available online, greatly improving access to one of the most valuable resources to family historians. The electronic index facilitates searching for death certificates issued by the Bureau of Vital Records between 1905 and 1954. Prior to going online last month the computerized index to Utah death certificates was available only in the Utah History Research Center, located in the remodeled south wing of the historic Rio Grande Depot.

The computer search engine is available via the Utah History Research Center web site:  
<http://historyresearch.utah.gov/indexes/20842.htm>

Costs are outlined at: <http://historyresearch.utah.gov/services/costs.htm>
